DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4,6-9 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent #4,593,505 to RUSSELL. In reference to claims 1 and 8, RUSSELL discloses the use of a modular wall including a wall panel (10) and an electrical distribution harness (14) having an electrical connector (column 3, lines 36-40), at least one channel (50), an electrical receptacle (22) and at least one receptacle mounting bracket (46) including a cutout (60) and an attachment element (as at curved portions (48)). Regarding claims 2-4 and 7-9, the receptacle mounting bracket (46) is rectangular, C-shaped, and is complimentary to the shape of the receptacle (22).

Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by US Patent #5,381,994 to WELCH. WELCH discloses a method of connecting an electrical receptacle (130) to an electrical distribution harness (120) including the steps of providing an electrical harness (120) including at least one channel (122); inserting the electrical receptacle (130) into an electrical connector (126); placing a receptacle mounting bracket (110) over the receptacle (130) through a cutout (116) therein; and attaching the mounting bracket (110) to the harness (120).

Allowable Subject Matter

Claims 5 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
